**Patent Number(s):**

JP2001072753-A ; JP3407701-B2

**Title:**

Manufacture of polyester for film, sheets and bottles, involves fine powder of polyester separation process and reducing the content of fine powder of polyester to specific value

**Patent Assignee Name(s) and Code(s):**

TOYOBO KK (TOYM)

**Derwent Primary Accession Number:**

2001-310889 [76]

**Abstract:**

NOVELTY - Polyester chip is dried after water treatment. Fine polyester powder separation process is performed and content of fine polyester powder is reduced to 100 ppm or less.

USE - For forming semi-finished molded products such as film, sheets and bottles.

ADVANTAGE - The polyester manufacture excels in transparency and crystallization of the molded product of the polyester is controllable. Generation of stains adhering to metallic mold used during molding of polyester, is prevented.

**International Patent Classification:**

C08G-063/183; C08G-063/88; B29B-013/00; B29K-067:00

**Derwent Class:**

A23 (Polyamides, polyesters, polycarbonates, alkyds); A32 (Polymer fabrication (moulding, extrusion, forming, laminating, spinning)); A92 (Packaging and containers, ropes, nets)

**Derwent Manual Code(s):**

A05-E01D3; A11-A02; A12-P06A
